

McDonald Dash Locksmith Supply

Locksmith Distributor Locks in Big Savings with VALOGIX[®] Inventory Planner

“In less than six months, we’ve reduced our inventory by more than \$75,000 and expect to reduce it by \$150,000 by the end of the first year.

Since automating planning and replenishment processes, we’ve increased productivity and have been able to secure discounts as much as 10% by referring to our forecast prior to ordering inventory. Gone are the days of buying lots of inventory just to get a deal. VALOGIX helps us get a good deal by ordering just what we need, when we need it.”

Phil McBee
Controller
McDonald Dash

Quick Facts

Company

- Name: McDonald Dash Locksmith Supply
- Location: Memphis, TN
- Industry: Security Products
- Products and services: Locksmith Supplies

- Maintained high service levels with less stock on shelves
- Improved staff productivity due to automated reporting

Software Solutions

VALOGIX[®] Inventory Planner with
SouthWare Innovations, Inc.

“In a very short time—less than three months—we were able to reduce overstocks and excess inventory by nearly 10%, and planning time has been dramatically reduced.”

Phil McBee
McDonald Dash

Buried Under Mountains of Inventory

As a wholesale distributor of locks, locksmith supplies and door hardware, McDonald Dash stocks more than 12,700 items. The 65 year-old distributor, located in Memphis, Tennessee also stocks key blanks, key machines, alarms, door closers and commercial security items.

Like many businesses, McDonald Dash planned inventory with Excel spreadsheets and intuition. Achieving balance with an inventory of almost 13,000 items was a daily challenge and often ended in sales promotions to move excess stock off the shelves.

After seeing a demonstration of VALOGIX® Inventory Planner at a software conference, Phil McBee, Controller for McDonald Dash knew it would make a big impact on their planning processes as well as on their inventory investment.

“When BTM Solutions, our local software distributor was hosting a SouthWare user conference (McDonald Dash’s ERP solution), I jumped at the opportunity to bring president Jim Thomas to see the Valogix product demonstration,” remarks McBee. “I knew once he saw the ease of use and dramatic impact on our bottom line, he’d be sold; and he was.”

Better Visibility to Stock Leads to Reductions

Tim Beckett, President of BTM Solutions, North American distributor for SouthWare Innovations, Inc. knew Valogix was a good fit for McDonald Dash business goals.

Tim explains, *“Accurately planning for nearly 13,000 items becomes extremely difficult because of the sheer volume of information needed to make good decisions. Even though McDonald Dash was doing an adequate job on their fast moving items, it just wasn’t possible to monitor and plan for every item.”*

“Information on Excel spreadsheets is static so it becomes out of date very quickly. McDonald Dash needed a solution that would very easily and accurately manage all of their items. Valogix gives them information they need at a click of a button so they can make strategic decisions and use the cash they would have spent on inventory to invest in other areas of the business.”

Within a few months after implementing VALOGIX Inventory Planner, Phil noticed big improvements in the stock mix and the time it took to do planning. *“What was once a nearly full time job was reduced by several hours a day,”* notes McBee.

Big Upfront and Long-Term Benefits

It was only a matter of months before McDonald Dash started to see results.

“In a very short time—less than three months—we were able to reduce overstocks and excess inventory by nearly 10%, and planning time has been dramatically reduced,” says McBee. *“Freeing up valuable time allows us to work on other areas of the business, like responding to customer inquiries and fulfilling sales orders.”*

McDonald Dash anticipates that their first year inventory reduction will reach \$150,000, already having reduced their stock value by more than \$75,000 in the first six months. Additionally, they use the forecast when placing orders from vendors so they are able to take advantage of promotional and shipping discounts. *“We save 10% off our orders when we use the VALOGIX forecast and we are able to move it quickly,”* adds
